Jaiden Henley

iOS/visionOS Developer

He/Him - jaidenhenleydev@gmail.com - Detroit, MI - LinkedIn - GitHub - Portfolio

SUMMARY

iOS and visionOS Developer with four apps live on the App Store. Currently building a visionOS application for a Detroit-based Healthcare provider as 1 of 25 learners selected for the Apple Developer Academy's Renaissance 2026-2027 cohort, after shipping a HealthKit research app under HIPAA constraints for a brain health nonprofit. Co-founder of CH Studios LLC, a software development studio with active contracts across iOS, Android and web.

EXPERIENCE

Co-Founder, iOS Developer

Apr 2026 - Present

CH Studios, LLC - Detroit, MI

- CloudCards (Contract): Leading the native iOS app for a digital business card platform, including a SwiftUI design system ported from the client's web app and the backend API spec for the App Clip, NFC/QR sharing, and native sign in.
- Tripsetta (Contract): Retained to maintain and build features across iOS (SwiftUI), Android (Kotlin), and web (HTML/CSS/JS) codebases for an AI-powered travel planning platform
- CommonSight (Contract): Built full Firebase backend from scratch, then led migration to Supabase including auth rewrite, Postgres schema design, RLS policies, and conference demo polish

iOS/visionOS Developer - Renaissance Apple Developer Academy

Aug 2026 - Present

Michigan State University - Detroit, MI

- Selected as 1 of 25 learners for the highly competitive 2026-2027 second-year cohort
- Building a visionOS application for an external client alongside a peer development team, using RealityKit, ARKit, hand tracking, and Reality Composer Pro

iOS Developer Intern

June 2026 - Sep 2026

Cognition Daily - Remote

- Sole iOS Developer for a brain health nonprofit ported a validated web research instrument to native SwiftUI and shipped it to the App Store without altering question wording or scoring logic that would invalidate the collected data.
- Integrated HealthKit sleep, activity, and mindfulness reads against a client-managed Supabase backend, with an offline write queue that reconciles local entries on reconnect.
- Implemented Sign in with Apple and Google authentication with Keychain-only credential storage, NSFileProtectionComplete data protection, and a maintained privacy manifest to meet HIPAA handling requirements and App Store review.

Bakery Manager

June 2020 - Present

M Street Baking Company - Howell, MI

- Promoted from Dishwasher to Bakery Manager over 5 years
- Managed a team of 10+ across daily operations, inventory, training, and quality control

PROJECTS

CoastCast - SwiftUI, CoreML, WeatherKit, FastAPI

Mar 2026 - May 2026

- Built and shipped a Michigan beach conditions app with a custom FastAPI backend deployed on Render, CoreML crowd prediction model trained end-to-end on real visitation data, and real time buoy, weather, and E. coli water quality integration
- Implemented WidgetKit, AppIntents/Siri Shortcuts, and background push notifications using BGAppRefreshTask

QuickStudy - SwiftUI

Nov 2025 - Feb 2026

- Built and shipped a study tool on the App Store that converts scanned notes and PDFs into flashcards with practice mode and multiple-choice quizzes using OCR pipeline built with VisionKit
- Implemented local persistence, PDF import, and MVVM architecture, added multi-provider AI support (OpenAI, Anthropic) with Keychain Storage

TakeFlight - SpriteKit, SwiftUI, Game Center

Nov 2025 - Feb 2026

- Shipped a 5-in-1 survival game set on Belle Isle with a team of five. Owned the core game loop, shared run state across five screens, and Game Center leaderboards and achievements.
- Built a SwiftUI virtual joystick and keyboard input on one shared movement layer, supporting iPhone, iPad, and macOS.

EDUCATION

iOS Developer - Apple Developer Academy

Aug 2025 - May 2026

Michigan State University - Detroit, MI

- Participating in non-credit certificate program designed to build a foundation for work and a career in an app economy using Apple's iOS ecosystem. Engage Apple's challenge based learning curriculum gaining exposure in coding, design, entrepreneurship, research and business analysis while focusing on coding.
- Built 5+ SwiftUI apps across professional development, productivity, and games in an Apple-backed program

100 Days of SwiftUI · Paul Hudson *Nov 2025 - Jan 2026*

Certificate of Merit - iOS Development - Online

SKILLS

Languages: Swift, Python, Kotlin, HTML, CSS, JavaScript

Apple Frameworks: SwiftUI, RealityKit, ARKit, HealthKit, SpriteKit, SwiftData, AVKit, MapKit, Foundation Models, Game Center, WeatherKit, CoreML, VisionKit, WidgetKit, AppIntents

Backend & Services: Firebase (Auth, Firestore), Supabase (Auth, Postgres, RLS), FastAPI (Render)

Architecture: MVVM, NavigationStack routing, JSON persistence, state management

Tools: Xcode, VSCode, Git/GitHub, Sketch, Reality Composer Pro, Swift Testing
